

The Ultimate Kitchen Planning Guide

At Schroll Cabinets, we know that planning a kitchen is about more than colors and knobs, it's creating a functional, lasting space that fits your lifestyle. This guide walks you from first ideas to the day your cabinets are installed.

1

Gather Inspiration

Start by exploring styles and materials, assessing your needs and collecting visuals.

- ▶ **Styles:** Modern, traditional or transitional - consider finishes, door styles and materials.
- ▶ **Needs:** How do you cook, entertain and store? Think about pantry space, islands and custom storage.
- ▶ **Visuals:** Photos, magazine clippings and Pinterest boards help communicate your vision.

2

Plan Your Budget

Set your budget early to avoid surprises.

- ▶ **Cabinets:** Plan for about 30-35% of your entire budget to go towards cabinetry.
- ▶ **Other Costs:** Countertops, hardware, appliances, lighting, flooring, plumbing, design fees.
- ▶ **Contingency:** Set aside 5-10% for unexpected expenses.

3

Design & Layout

Create a kitchen that's efficient and stylish.

- ▶ **Work Triangle:** Position sink, stove, and fridge for smooth workflow.
- ▶ **Zones:** Define prep, cooking, storage and cleanup areas.
- ▶ **Cabinet Configuration:** Frameless or inset, adjustable shelving and specialized storage.

Our design team provides 3D renderings so you can see your kitchen before production.

4

Cabinet Construction & Materials

Understand your options to make confident choices.

- ▶ **Framed vs. Frameless:** Frameless maximizes storage and looks modern; framed offers traditional style.
- ▶ **Materials:** Solid wood, plywood and MDF have different durability, finish and maintenance.
- ▶ **Hardware & Accessories:** Soft-close hinges, pull-outs, spice racks and corner solutions improve function and longevity.

We guide every detail so your cabinets are intentional and built to last.

HOW WE WORK

Consultation & Design	Visit our showrooms to explore styles and layouts with our skilled team.
Site Visit & Measurements	We measure your space precisely to ensure a perfect fit.
Production	Cabinets are made to order in Cheyenne with stocked materials for quality and speed.
Build Updates & Communication	We keep you informed on progress and delivery schedules.
Delivery & Quality Control	We deliver your cabinets, provide guidance and stand behind every project with a strong warranty.
